

# Target Market Determination

FOR UNISUPER ACCUMULATION 2

## About this document

This Target Market Determination (TMD) seeks to provide individuals who:

- are an Accumulation 2 member after having elected to move from the UniSuper Defined Benefit Division (DBD) at some point in their membership and who are considering switching their investment options from the Balanced (MySuper) option; or
- transferred to Accumulation 2 after having selected investment options other than the Balanced option within the accumulation component of their DBD account;

and distributors of the Accumulation 2 product with an understanding of the types of individuals for whom this product has been designed.

The product design has considered the possible objectives, financial situations and needs of the individuals who fall within the determined target market.

This document is not to be treated as a summary of the product's terms and conditions and is not intended to provide financial advice. The information in this document is of a general nature only and doesn't take into account any person's individual objectives, financial situation or needs. Individuals must refer to the Product Disclosure Statement (PDS) and any supplementary documents and consider obtaining financial advice before making a decision about this product.

### PRODUCT TO WHICH THIS TMD APPLIES

This TMD applies to the Accumulation 2 product which is explained in the [Defined Benefit Division and Accumulation 2 PDS](#) and the following important information documents (each of which forms part of the PDS):

- [How super works](#)
- [Insurance in your super](#)
- [Risks of super](#)
- [How we invest your money](#)
- [Fees and costs](#)
- [How super is taxed.](#)

These documents are available at [unisuper.com.au/pds](https://unisuper.com.au/pds) or by calling **1800 331 685**.

### IMPORTANT DATES

Date from which this TMD is <b>effective</b>	1 November 2021
Date when this TMD was <b>last reviewed</b>	1 November 2021
Date when this TMD will be <b>next reviewed</b>	No later than 1 November 2022

## Individuals that fall within this target market

Accumulation 2 has been designed for DBD members who are looking to transfer to an accumulation style account and invest their superannuation (super) savings in a simple product that allows them to grow their account balance within the super system.

Insurance cover can be obtained through the product that can protect the financial wellbeing of the member and their family in the event of death (or diagnosis of a terminal illness) or inability to earn an income due to illness or injury, subject to eligibility requirements.

Through the 16 investment options provided and the ability to obtain different types and levels of insurance cover (or no cover at all), the individuals within the Accumulation 2 target market are those Australians seeking to invest their super in a way suited to their circumstances (to meet their investment needs) and, through obtaining insurance, to protect themselves (and their dependants in the event of death) from financial distress arising from unforeseen health events (to meet their insurance needs).

Once eligible, members can use some or all of their account balance to purchase a super income stream product, or withdraw their balance as cash, to support the lifestyle they want in retirement.

## MEETING MEMBERS' INVESTMENT NEEDS

Accumulation 2 provides the ability to choose from one or a combination of 16 investment options, offering exposure to particular asset classes such as shares, property, infrastructure and private equity, fixed interest and cash.

By considering the characteristics of each option, a member (possibly supported by a financial adviser), can select the investment option(s) which best align to their financial goals in retirement, personal circumstances and attitude to investment risk, and therefore seek to **meet their investment needs**.

The member's account balance at retirement will depend primarily on how their chosen investment options perform over time, the amount of contributions made to their account, and any fees, costs, taxes and insurance premiums charged. The level of investment returns that can reasonably be achieved is linked to the level of risk associated with the investment option(s) the member selects over the period of time they are invested through the Accumulation 2 product.

UniSuper's investment process considers environmental, social and governance issues across all investments. For members who want to screen out contentious sectors or want to invest in environmental themes, there are three dedicated sustainable and environmental options.

Members who don't make an investment choice will have their super automatically invested in the default Balanced (MySuper) investment option. Although this option does not technically form part of this TMD, we've included information about the Balanced (MySuper) option in this TMD so that members can consider all aspects of the Accumulation 2 product together.

## MEETING MEMBERS' INSURANCE NEEDS

Accumulation 2 also provides flexible insurance options (Death, Total and Permanent Disablement and Income Protection) to provide a level of financial security in the event of illness or injury. Premiums for this cover are paid from the member's account balance. Members should consider their eligibility for cover and the level of cover they require for their circumstances.

By considering their personal financial position, a member (again, possibly supported by a financial adviser, or using the [Insurance calculator](#) provided by UniSuper), can select the types and level of Insurance cover they desire that could best protect them from financial distress should they die, become totally and permanently disabled, or require income replacement due to the inability to work arising through illness or injury, and therefore **meet their insurance needs**. A member may need to apply for increased levels of cover above the amount available to them without evidence of health to meet their insurance need in full.

As insurance premiums are paid through a member's account balance, where the member has an insurance need, this may detract from meeting their investment need. Members should consider both their investment needs and insurance needs when selecting options within their Accumulation 2 account.

## INDIVIDUALS THAT FALL OUTSIDE THIS TARGET MARKET

Accumulation 2 has not been designed for individuals who:

- prefer the relative certainty that defined benefits can provide (because they're insulated from the fluctuations of the financial markets)
- are looking to invest in a pension phase product to drawdown their super savings as a regular income
- want a more active role in the investment and management of their retirement savings through direct investment in shares, exchange traded funds, listed investment companies and term deposits.

The insurance available within Accumulation 2 has not been designed for individuals who:

- are over 75 years of age and require Death cover
- are over 70 years of age and require TPD cover
- are over 65 years of age and require Income Protection cover
- require Income Protection cover and are employed in an excluded occupation at the time of applying for the cover
- require cover for an injury or illness that is subject to an exclusion and/or special condition, as outlined in the [Insurance in your super](#) important information booklet
- require cover that is not Death cover, TPD cover or Income Protection cover
- require the terms and conditions of the policy to be customised to their situation, as occurs with an individual retail insurance policy.

## PRODUCT DESCRIPTION AND KEY ATTRIBUTES

The key product attributes and eligibility requirements of Accumulation 2 are:

### Product attributes

- an easy to manage product that offers choice and flexibility
- simple and transparent fees
- access to a range of Pre-Mixed and Sector investment options which can be selected based on a member's investment and retirement goals
- access to Death (including Terminal Illness), Total and Permanent Disablement (TPD) and Income Protection cover, including a level of cover offered without evidence of health (subject to eligibility)
- access to financial advice from highly qualified and experienced professionals
- access to a pension account to start an income stream at retirement
- online account access.

### Eligibility

To be eligible for an Accumulation 2 account, the individual must:

- work for an employer participating in UniSuper, and
- be a DBD member who is in the first two years of their DBD membership or have elected to move from the DBD to Accumulation 2 during a previous period of DBD membership.

To be eligible for insurance cover, the individual must be:

- an Accumulation 2 member, and
- fall within the eligible age range and satisfy the eligibility conditions to commence and maintain cover as set out in the PDS.

## OBJECTIVES, FINANCIAL SITUATION AND NEEDS

### Investment options

The tables which follow set out the types of members for whom each investment option within Accumulation 2 has been designed:

#### Pre-Mixed options

Pre-Mixed options are designed for members who, after considering the performance objective, suitability, suggested investment time frame and level of associated risk of the available investment options, prefer to have their investments across asset classes chosen and managed on their behalf. Pre-Mixed options are designed to be held as the single, or at least the largest, investment in an Accumulation 2 portfolio.

	CONSERVATIVE	CONSERVATIVE BALANCED	BALANCED (MYSUPER)	SUSTAINABLE BALANCED
<b>Performance objective<sup>1</sup></b>	Achieve returns <sup>2</sup> that outperform CPI by at least 1.0% p.a. over the suggested time frame.	Achieve returns <sup>2</sup> that outperform CPI by at least 2.0% p.a. over the suggested time frame.	CPI + 3.8% p.a. over 10 years <sup>3</sup> for a member who has a constant \$50,000 balance and who does not incur any activity-based fees.	Achieve returns <sup>2</sup> that outperform CPI by at least 3.0% p.a. over the suggested time frame.
<b>Suitability</b>	Members who: <ul style="list-style-type: none"> <li>want exposure to a range of asset classes</li> <li>are less comfortable with large fluctuations in the value of their investments.</li> </ul>	Members who: <ul style="list-style-type: none"> <li>want exposure to a range of asset classes</li> <li>are less comfortable with large fluctuations in the value of their investments.</li> </ul>	Members who: <ul style="list-style-type: none"> <li>want exposure to a range of asset classes</li> <li>are comfortable with the value of their investments fluctuating.</li> </ul>	Members who: <ul style="list-style-type: none"> <li>want exposure to a range of asset classes</li> <li>are comfortable with the value of their investments fluctuating</li> <li>understand that returns from listed property exposures are different from (and more volatile than) returns from owning real property</li> <li>want to invest in environmental themes or screen out contentious sectors.<sup>4</sup></li> </ul>
<b>Suggested investment time frame</b>	Minimum of 5 years	Minimum of 5 years	Minimum of 10 years	Minimum of 6 years
<b>Summary risk level<sup>5</sup></b>	Medium	Medium to High	High	High
<b>Expected frequency of negative annual return<sup>5</sup></b>	2 to less than 3 in 20 years	3 to less than 4 in 20 years	4 to less than 6 in 20 years	4 to less than 6 in 20 years

<sup>1</sup> Performance objectives are not promises or predictions of any particular rate of return.

<sup>2</sup> After taxes and investment expenses, before deducting account-based fees.

<sup>3</sup> After fees, costs and taxes.

<sup>4</sup> From time to time due to timing differences between the activities of a company (for example where there has been an acquisition or divestment) and the reporting of a company's activities, some companies may temporarily fall outside of the screens.

<sup>5</sup> Based on the Standard Risk Measure produced by the Association of Superannuation Funds of Australia (ASFA) and Financial Services Council (FSC) working group, supported by the Australian Securities and Investments Commission (ASIC) and Australian Prudential Regulation Authority (APRA). The Standard Risk Measure is a guide as to the likely number of negative annual returns expected over any 20-year period.

	<b>GROWTH</b>	<b>HIGH GROWTH</b>	<b>SUSTAINABLE HIGH GROWTH</b>
<b>Performance objective<sup>1</sup></b>	Achieve returns <sup>2</sup> that outperform CPI by at least 3.5% p.a. over the suggested time frame.	Achieve returns <sup>2</sup> that outperform CPI by at least 4.0% p.a. over the suggested time frame.	Achieve returns <sup>2</sup> that outperform CPI by at least 4.0% p.a. over the suggested time frame.
<b>Suitability</b>	Members who: <ul style="list-style-type: none"> <li>want exposure to a range of asset classes</li> <li>are comfortable with the value of their investments fluctuating.</li> </ul>	Members who: <ul style="list-style-type: none"> <li>want exposure to a range of asset classes</li> <li>are comfortable with the value of their investments fluctuating.</li> </ul>	Members who: <ul style="list-style-type: none"> <li>want exposure to a range of asset classes</li> <li>are comfortable with the value of their investments fluctuating</li> <li>understand that returns from listed property exposures are different from (and more volatile than) returns from owning real property</li> <li>want to invest in environmental themes or screen out contentious sectors.<sup>3</sup></li> </ul>
<b>Suggested investment time frame</b>	Minimum of 7 years	Minimum of 7 years	Minimum of 7 years
<b>Summary risk level<sup>4</sup></b>	High	High	High
<b>Expected frequency of negative annual return<sup>4</sup></b>	4 to less than 6 in 20 years	4 to less than 6 in 20 years	4 to less than 6 in 20 years

<sup>1</sup> Performance objectives are not promises or predictions of any particular rate of return.

<sup>2</sup> After taxes and investment expenses, before deducting account-based fees.

<sup>3</sup> From time to time due to timing differences between the activities of a company (for example where there has been an acquisition or divestment) and the reporting of a company's activities, some companies may temporarily fall outside of the screens.

<sup>4</sup> Based on the Standard Risk Measure produced by the Association of Superannuation Funds of Australia (ASFA) and Financial Services Council (FSC) working group, supported by the Australian Securities and Investments Commission (ASIC) and Australian Prudential Regulation Authority (APRA). The Standard Risk Measure is a guide as to the likely number of negative annual returns expected over any 20-year period.

### Sector options

Sector options are designed for those who are more hands-on investors who have experience in selecting and monitoring their investments across assets classes. No individual Sector option is designed to make up 100% of a portfolio. Instead, they're intended to be used by members in combination with other Sector or Pre-Mixed options, or to complement a broader existing investment portfolio.

	CASH	AUSTRALIAN BOND	DIVERSIFIED CREDIT INCOME	LISTED PROPERTY
<b>Performance objective<sup>1</sup></b>	Achieve the RBA cash rate <sup>2,3</sup> over the suggested time frame.	Achieve returns <sup>2</sup> that match the relevant government bond index over the suggested time frame.	Achieve returns <sup>2</sup> that exceed the RBA cash rate by 1.0% p.a. over the suggested time frame.	Achieve returns <sup>4</sup> that outperform CPI by at least 3.0% p.a. over the suggested time frame.
<b>Suitability</b>	Members who: <ul style="list-style-type: none"> <li>want to invest in a specific asset class</li> <li>are less comfortable with large fluctuations in the value of their investments.</li> </ul>	Members who: <ul style="list-style-type: none"> <li>want to invest in a specific asset class</li> <li>are less comfortable with large fluctuations in the value of their investments.</li> </ul>	Members who: <ul style="list-style-type: none"> <li>want to invest in a specific asset class</li> <li>are less comfortable with large fluctuations in the value of their investments.</li> </ul>	Members who: <ul style="list-style-type: none"> <li>want to invest in a specific asset class</li> <li>are comfortable with the value of their investments fluctuating</li> <li>understand that returns from listed property exposures are different from (and more volatile than) returns from owning real property.</li> </ul>
<b>Suggested investment time frame</b>	Minimum of 1 year <sup>5</sup>	Minimum of 5 years	Minimum of 4 years	Minimum of 6 years
<b>Summary risk level<sup>6</sup></b>	Very low	High	High	High
<b>Expected frequency of negative annual return<sup>6</sup></b>	Less than 0.5 years in 20 years	4 to less than 6 in 20 years	4 to less than 6 in 20 years	4 to less than 6 in 20 years

<sup>1</sup> Performance objectives are not promises or predictions of any particular rate of return.

<sup>2</sup> Before fees and taxes.

<sup>3</sup> The RBA cash rate is the interest rate on unsecured overnight loans between banks. The overnight (interbank) cash rate can differ from the RBA's cash rate target.

<sup>4</sup> After taxes and investment expenses, before deducting account-based fees.

<sup>5</sup> Depending on circumstances, this investment option may also be suitable for a suggested time frame of less than one year.

<sup>6</sup> Based on the Standard Risk Measure produced by the Association of Superannuation Funds of Australia (ASFA) and Financial Services Council (FSC) working group, supported by the Australian Securities and Investments Commission (ASIC) and Australian Prudential Regulation Authority (APRA). The Standard Risk Measure is a guide as to the likely number of negative annual returns expected over any 20-year period.

	AUSTRALIAN SHARES	INTERNATIONAL SHARES	GLOBAL ENVIRONMENTAL OPPORTUNITIES	AUSTRALIAN EQUITY INCOME	GLOBAL COMPANIES IN ASIA
<b>Performance objective<sup>1</sup></b>	Achieve returns <sup>2</sup> that outperform CPI by at least 4.0% p.a. over the suggested time frame.	Achieve returns <sup>2</sup> that outperform CPI by at least 4.0% p.a. over the suggested time frame.	Achieve returns <sup>2</sup> that outperform CPI by at least 4.0% p.a. over the suggested time frame.	Achieve a gross yield which exceeds the dividend yield of the Australian equity market and provide potential for capital growth over the suggested time frame.	Achieve returns <sup>2</sup> that outperform CPI by at least 4.0% p.a. over the suggested time frame.
<b>Suitability</b>	Members who: <ul style="list-style-type: none"> <li>want to invest in a specific asset class</li> <li>are comfortable with the value of their investments fluctuating.</li> </ul>	Members who: <ul style="list-style-type: none"> <li>want to invest in a specific asset class</li> <li>are comfortable with the value of their investments fluctuating.</li> </ul>	Members who: <ul style="list-style-type: none"> <li>want to invest in a specific asset class</li> <li>are comfortable with the value of their investments fluctuating</li> <li>want to invest in environmental themes or screen out contentious sectors.<sup>3</sup></li> </ul>	Members who: <ul style="list-style-type: none"> <li>want to invest in a specific asset class</li> <li>are comfortable with the value of their investments fluctuating.</li> </ul>	Members who: <ul style="list-style-type: none"> <li>want to invest in a specific asset class</li> <li>are comfortable with the value of their investments fluctuating.</li> </ul>
<b>Suggested investment time frame</b>	Minimum of 7 years	Minimum of 7 years	Minimum of 7 years	Minimum of 7 years	Minimum of 7 years
<b>Summary risk level<sup>4</sup></b>	High	High	Very High	High	High
<b>Expected frequency of negative annual return<sup>4</sup></b>	4 to less than 6 in 20 years	4 to less than 6 in 20 years	6 or greater in 20 years	4 to less than 6 in 20 years	4 to less than 6 in 20 years

<sup>1</sup> Performance objectives are not promises or predictions of any particular rate of return.

<sup>2</sup> After taxes and investment expenses, before deducting account-based fees.

<sup>3</sup> From time to time due to timing differences between the activities of a company (for example where there has been an acquisition or divestment) and the reporting of a company's activities, some companies may temporarily fall outside of the screens.

<sup>4</sup> Based on the Standard Risk Measure produced by the Association of Superannuation Funds of Australia (ASFA) and Financial Services Council (FSC) working group, supported by the Australian Securities and Investments Commission (ASIC) and Australian Prudential Regulation Authority (APRA). The Standard Risk Measure is a guide as to the likely number of negative annual returns expected over any 20-year period.

## Insurance

The table below sets out the types of members for whom each insurance option within Accumulation 2 has been designed:

OPTION	TYPE OF MEMBERS
<b>Death cover (including Terminal Illness)</b>	Members who: <ul style="list-style-type: none"> <li>are employed, unemployed or performing domestic duties</li> <li>want to financially protect their family in the event they die or are diagnosed with a terminal illness, and</li> <li>meet the eligibility requirements.</li> </ul>
<b>TPD cover</b>	Members who: <ul style="list-style-type: none"> <li>are employed, unemployed or performing domestic duties</li> <li>want to financially protect themselves and their family in the event they become totally and permanently disabled, and</li> <li>meet the eligibility requirements.</li> </ul>
<b>Income Protection cover</b>	Members who: <ul style="list-style-type: none"> <li>are gainfully employed</li> <li>want a regular monthly payment in the event they become temporarily unable to do their job due to illness or injury, and</li> <li>meet the eligibility requirements.</li> </ul>

If a member meets the eligibility requirements, they can elect to receive Death, TPD and/or Income Protection cover to replace their inbuilt benefits ('transitioned cover') without having to provide any evidence of their health. This election must be made at the time of completing the *Transferring from the Defined Benefit Division to Accumulation 2* form.

If a member did not elect to receive transitioned cover and later wishes to obtain cover, they will need to apply for and be accepted for cover by our Insurer. Evidence of health may be required.

## CONSISTENCY BETWEEN TARGET MARKET AND THE PRODUCT

We have determined that Accumulation 2 is likely to be consistent with the likely objectives, financial situation and needs of the individuals in the target market. This is based on an analysis of the key terms, features and attributes of the product and a finding that these are consistent with the identified target market. This includes consideration of expected future pricing of the product and whether the target market is appropriate if product costs increase.

## How this product is to be distributed

### DISTRIBUTION CHANNELS

This product is designed to be distributed through the following means:

- UniSuper participating employers
- Financial advisers.

### DISTRIBUTION CONDITIONS

This product should only be distributed to individuals that meet the eligibility requirements; as outlined in the PDS or applicable important information document (which forms part of the PDS).

### ADEQUACY OF DISTRIBUTION CONDITIONS AND RESTRICTIONS

We have determined that the distribution conditions and restrictions will make it likely that individuals who purchase the product are in the target market for which it has been designed. This is based on an assessment of the distribution conditions and restrictions and that they are appropriate and will assist distribution in being directed towards the target market for whom the product has been designed.

## Reviewing this TMD

We will review this TMD as follows:

<b>Initial review</b>	No later than 1 November 2022 (within one year from the effective date).
<b>Subsequent periodic reviews</b>	No later than 1 November 2025 (within three years from the initial review date) and each three years thereafter.
<b>Review triggers or events</b>	<p>Any event or circumstance that would reasonably suggest the TMD is no longer appropriate. The following may (but will not necessarily) constitute a review trigger or event:</p> <ul style="list-style-type: none"> <li>▪ receipt of a Product Intervention Power order from the Australian Securities and Investments Commission (ASIC) requiring UniSuper to cease retail distribution of the product</li> <li>▪ a material change to the design or distribution of the product, including related documentation</li> <li>▪ occurrence of a significant dealing(s)</li> <li>▪ distribution conditions found to be inadequate</li> <li>▪ identification of significant detriment to members if TMD was not reviewed</li> <li>▪ external events such as adverse media coverage or regulatory attention regarding the design or distribution of the product</li> <li>▪ significant changes in metrics, including, but not limited to: <ul style="list-style-type: none"> <li>– material increase in the rate of complaints lodged with the Australian Financial Complaints Authority (AFCA)</li> <li>– significant increase in the proportion of members exiting the product</li> <li>– material increase in the proportion of member accounts closed within the cooling off period</li> <li>– significant increase in the insurance cancellation rates</li> <li>– significant increase in the proportion of insurance claims being denied or withdrawn</li> </ul> </li> <li>▪ persistent member complaints about investment options or the product</li> <li>▪ a change has occurred that affects the objectives of the target market</li> <li>▪ the trustee makes a determination for the purposes of s52(9) of <i>Superannuation Industry (Supervision) Act 1993</i> (Member Outcomes Assessment) that the financial interests of the members who hold the product are not being promoted.</li> </ul>

Where a review trigger has occurred, or an event or circumstance occurs that would reasonably suggest that the TMD is no longer appropriate, this TMD will be reviewed within 10 business days.

## Reporting and monitoring this TMD

We will collect the following information from our distributors in relation to this TMD:

<b>Complaints</b>	Distributors will report all complaints in relation to the product covered by this TMD within 10 business days after the end of 31 March and 30 September. This will include written details of the substance of complaints and general feedback received relating to the product and its performance.
<b>Significant dealings</b>	<p>Distributors will report if they become aware of a dealing in relation to the product that is inconsistent with this TMD within 10 business days. This will include written details of the substance of the dealing, the date range of when the dealing occurred, the number of members to whom the report relates and whether member harm or detriment has (or likely has) occurred as a result of the dealing.</p> <p>A dealing includes circumstances where:</p> <ul style="list-style-type: none"> <li>▪ an individual who has acquired the product falls outside of the target market and whose financial exposure outside of the target market is greater than 5% of their total investment in the product or \$10,000</li> <li>▪ a member who holds insurance cover for which they are ineligible.</li> </ul>
<b>Acquisitions outside the target market</b>	Distributors will report all acquisitions that are known to be outside of the target market within 10 business days after the end of 31 March and 30 September. This will include written details of why the acquisition is outside the target market and whether it occurred under personal advice.

All information must be reported to [ddo@unisuper.com.au](mailto:ddo@unisuper.com.au).
