Version 2.0

Issue date 13 January 2018

1 Introduction

UniSuper is able to receive and process certain member data updates sent electronically via a Member Registration Request (MRR), as well as receive Contribution Transaction Requests (CTR) and payments from an employer. When we receive member updates or contributions, validations are performed to ensure we can complete processing and allocation.

When these validations fail, errors are raised that need to be addressed before member updates can occur or contributions can be allocated.

This guide should be read in conjunction with the Outstanding Errors and Warnings report you have received, and describes what actions you need to take to clear the errors raised.

2 Clearing errors

The Outstanding Errors and Warnings report will be automatically emailed* to you once the contribution data and payment have both been received. Note: this will be mailed where your email address is not recorded.

This report contains detailed information on validations that have failed, resulting in the data update or contribution not being processed. These validations require action from you.

Information in the report includes exceptions raised as a result of invalid, inadequate, missing or unexpected data or details about unallocated contributions as a result of an error. If contribution related errors are not cleared by the Refund Date, the Unallocated Amounts will be refunded.

The tables in sections 2.1 and 2.2 of this document detail each of the error codes and the actions required to clear them.

Members may be contacted where they are required to provide information in order for the error to be cleared, such as, where they have changed their name and haven't notified us.

The following steps will assist you in providing the required information to clear any errors:

- Check the error code number in the Outstanding Errors and Warnings report.
- Refer to the relevant error code in the tables in sections 2.1 and 2.2 on the next page.
- Determine the applicable scenario.
- Follow the action required to clear the error (if applicable).

Where you are submitting additional information to us, please use the email template provided in the *Quick Links* section of the *Information for non-participating employers* page of our website: unisuper.com.au/employers.

If errors are not cleared by the Refund Date, any Unallocated Amount will be refunded to the bank account or clearing house that the *payment was received from*.

Where we do not hold banking details on file, your payment will be refunded via cheque.

* We will use the email address you supplied in the MRR or CTR.

3 Member update error codes

The table below details a list of error codes and the meanings:

Error code	Description and meaning	Possible scenarios	Action required to clear the error
990540	<p>“Commencement date cannot be prior to existing date joined fund”</p> <p>This occurs where a member already has an employment history on our system and an MRR is received from another employer. This error will occur if the employment start date in the message is prior to the date when the member first joined UniSuper.</p>	The date provided in the file is incorrect.	Resubmit the MRR with the correct information. OR If data is submitted via a clearing house, check if they have the correct information.
